Community and Me is one of a suite of courses designed to provide basic skills to learners with high needs, many of whom have a learning difficulty or disability

Some learners may need the full suite of courses for study in both Years 11 and 12, some may need it for only part of their course load, and other learners may need only some courses in Year 11 before moving to other programs for Year 12. In Community and Me, learners will develop their understanding of the community in which they live, the organisations and services that may meet their needs, and how to access a range of services by utilising safe transport options. This course is specifically designed for learners who require flexible and individualised programs. The skills, knowledge and understandings offered in this course will enable learners to move towards greater autonomy and independence. Learners will experience some local events to further their understanding of their local community.

Course Description

Using a practical skills-based approach, students learn about various community organisations and their roles. They will learn about their rights and responsibilities. Students will learn about key events and celebrations to develop their understanding of links between the community and themselves.

Learning will take place in a limited range of highly familiar contexts, using concrete and immediate examples, in a very restricted range of contexts and using limited and highly familiar vocabulary. Tasks will involve a limited number of familiar processes.

Rationale

Community and Me is one of a suite of courses designed to provide basic skills to learners with high needs, many of whom have a learning difficulty or disability.

Some learners may need the full suite of courses for study in both Years 11 and 12, some may need it for only part of their course load, and other learners may need only some courses in Year 11 before moving to other programs for Year 12.

In Community and Me, learners will develop their understanding of the community in which they live, the organisations and services that may meet their needs, and how to access a range of services by utilising safe transport options.

This course is specifically designed for learners who require flexible and individualised programs. The skills, knowledge and understandings offered in this course will enable learners to move towards greater independence.

Learning Outcomes

On successful completion of this course, learners will be able to:

1. know about relevant organisations and facilities in their local community
2. have the necessary skills to access personal transport
3. have the basic skills needed to interact with others in their community
4. know about some local and national events and celebrations, and some notable Australian people

Pathways

This course may be a pathway to Level 1 courses Community Service Learning and Personal Health and Wellbeing.

Resource Requirements

All learners have a right to an education that meets their needs through full participation and engagement with learning. Teachers need to enhance the quality of all students' learning through responsive and planned learning programs that optimise achievement using inclusive practices.

Learners should have access to appropriate resources such as professional support staff; or adult assistance, and equipment such as assistive technology or modified facilities, as required. The *Disability Standards for Education*, 2005 outline the obligations that educational providers must meet in supporting the needs of students with disability through reasonable adjustments.

Adjustments include a range of supports and accommodations including but not limited to: supportive learning environments, tailored delivery models, visual and organisational supports, multimodal learning and assessment opportunities, varying levels of prompting and adult assistance. In the instance of online, distance or flexible delivery, adjustments may be made to the courses by teachers to suit the individual student's learning environment. This may involve adaptation of the course to reflect the resources readily available to the learner within their home or community.

Course Size And Complexity

This course has a complexity level preliminary to Level 1.

This course has a size value of 15.

Relationship Of Qualifications to TASC Certificates

NOTATION ON EVIDENCE OF LEARNING

Some of the criteria standard elements (see below) use the terms 'identify' or 'describe'.

In the context of this preliminary level course, 'identification' might be done via methods such as:

- correctly selecting from a given list
- correctly selecting from a set of images
- correctly naming from memory or after consulting a source such as the internet.

'Selecting' might be done by methods such as: pointing; nodding; circling with a pen; or matching (e.g. picture with corresponding name card).

In the context of this preliminary level course, 'describing' might be done via methods such as:

- an oral description
- a written description (e.g. a word list of characteristics)
- a series of actions
- a series of images with simple written notations.

Assessment

Criterion-based assessment is a form of outcomes assessment that identifies the extent of learner achievement at an appropriate end-point of study. Although assessment – as part of the learning program – is continuous, much of it is formative, and is done to help learners identify what they need to do to attain the maximum benefit from their study of the course. Therefore, assessment for summative reporting to TASC will focus on what both teacher and learner understand to reflect end-point achievement.

The standard of achievement each learner attains on each criterion is recorded as a rating of 'C' (satisfactory standard) according to the outcomes specified in the standards section of the course document.

A 't' notation must be used where a learner demonstrates any achievement against a criterion less than the standard specified for the 'C' rating. The 't' notation is not described in course standards.

A 'z' notation is to be used where a learner provides no evidence of achievement at all.

Providers offering this course must participate in quality assurance processes specified by TASC to ensure provider validity and comparability of standards across all awards. To learn more, see TASC's [quality assurance](#) processes and [assessment](#) information.

Internal assessment of all criteria will be made by the provider. Assessment processes must gather evidence that clearly shows the match between individual learner performance, the standards of the course and the learner's award. Providers will report the learner's rating for each criterion to TASC.

Quality Assurance Process

The following process will be facilitated by TASC to ensure there is:

- a match between the standards of achievement specified in the course and the skills and knowledge demonstrated by learners
- community confidence in the integrity and meaning of the qualification.

Process – Each provider is responsible for ensuring the integrity and validity of their assessment results against the requirements of the course, including standards, and for maintaining records and documentation that will demonstrate the integrity, accuracy and validity of the award decisions they make each year.

Where TASC identifies sufficient potential for concern about the integrity or validity of a provider's award decisions it will undertake an investigation. After such an investigation is completed, TASC may take action under Section 33 of the *Office of Tasmanian Assessment, Standards and Certification Act 2003* as it considers appropriate, including but not limited to:

- giving the school/college a direction in relation to the provision or assessment of the course (section 33 (2))
- refusing to accept results for this course from the provider (section 33 (4)).
