

Preliminary Science Stage 1

LEVEL PRE	0 TCE CREDIT POINTS
COURSE CODE	PRS005119
COURSE SPAN	2019 — 2023
READING AND WRITING STANDARD	NO
MATHEMATICS STANDARD	NO
COMPUTERS AND INTERNET STANDARD	NO

This course was delivered in 2019. Use [A-Z Courses](#) to find the current version (if available).

Preliminary Science caters for learners who require flexible and individualised programs

Learners will experience a range of learning activities in a familiar context that will assist them to attend to and explore the world around them with as much independence as possible.

Course Description

This course is organised into four sequential stages. Each stage includes a learning focus statement and examples of student learning. Each stage is designed to accommodate a student's level of readiness and reflects their stage of development. It may be likely that a learner will engage in only one stage of learning in their study of this course.

The learning program focuses on ideas, skills, techniques and processes. It includes engagement in concepts that emerge from a range of starting points and stimuli.

This document represents **Stage 1** of the course *Preliminary Science*.

Introduction to Preliminary to Level 1 courses

This course has been accredited under Section 55ZI of the Office of Tasmanian Assessment, Standards and Certification Act 2003 - Other education. 'Other education' is defined by the Act as including 'education specifically designed for a person with a disability'.

Section 55ZM of the Act requires that providers of this course issue qualifications to learners who achieve a Preliminary Achievement (PA) award or higher at any stage or size value. For further information and examples, see the Supporting Documents section of this course.

In addition to provider-issued qualifications, course providers may report learner results to the Office of TASC in late November each year using prescribed methods. Reported results will be used by TASC for inclusion on students' Qualification Certificates (QCs) and may form part of the evidence base for a Tasmanian Certificate of Educational Achievement (TCEA) for eligible learners.

Achievement in courses Preliminary to Level 1 does not contribute to the Tasmanian Certificate of Education (TCE). This allows for greater flexibility in regard to learner movement between stages and their learning time (reflected in variable size values for this course) than are available in Level 1 and higher senior secondary courses.

Learners

The Preliminary to Level 1 suite of courses are designed for learners whose circumstances significantly impact their learning – in an ongoing manner or for extended periods of time.

These learners include:

- learners with disability as defined by the Disability Discrimination Act (DDA) 1992, whose disability requires educational adjustments to support access and participation in learning
- learners whose circumstances have significantly impacted their ability to attend school for extended periods of time or engage in courses with higher levels of complexity
- learners who require significant support for learning English as an additional language or dialect.

Rationale

Preliminary Science is one of a suite of courses designed to provide basic skills to learners with high needs, many of whom have a learning difficulty or disability. Some learners may need the full suite of courses for study in both years 11 and 12, some may need it for only part of their course load, and other learners may need only some courses in year 11 before moving to other programs for year 12.

The study of Science involves learners in observing, categorising and interpreting their world and the relationship they have with it through a process of inquiry.

Preliminary Science caters for learners who require flexible and individualised programs. Learners will experience a range of learning activities in a familiar context that will assist them to attend to and explore the world around them with as much independence as possible. Learning experiences in this course are designed to move learners from an emergent level of responding to a level where the response indicates intention.

Preliminary Science aims to offer better outcomes in all aspects of learners' lives, and assist learners' access to achievable pathways to further training and or employment outcomes.

Aims

This *Preliminary Science* course aims to ensure that learners develop:

- an interest in science as a means of expanding their curiosity, and willingness to explore and ask questions about the world in which they live
- an understanding of the vision that science provides of the nature of living things, of the Earth, and of the physical and chemical processes that explain the behaviour of all material things
- an understanding of scientific inquiry, including: questioning; planning and conducting experiments and investigations; collecting, organising and interpreting data; reflecting on results; and drawing evidence-based conclusions
- an ability to communicate scientific understanding and findings to justify ideas on the basis of evidence
- an ability to solve simple problems and make informed, evidence-based decision
- an understanding of science activities to explore their place in the world
- knowledge of the biological, chemical, physical, Earth and space sciences, including being able to select and integrate the scientific knowledge needed to explain and predict phenomena, and to apply that understanding.

Learning Outcomes

On successful completion of this course, learners will be able to:

1. identify properties and behaviour of some objects, living things and their environment
2. find patterns in properties and behaviour of some objects, living things and their environment
3. observe and interpret change in properties and behaviour of some objects, living things and their environment
4. use tools and equipment for a simple task
5. communicate ideas and observations about their environment, objects and living things
6. act on instructions and monitor their own progress.

Stages of Learning at Preliminary to Level 1

This course focuses on progressing learners from an emergent to early conventional level. It encourages learners to develop their independence as they explore, participate and engage in the world around them. Expectations for learner achievement are set at four stages which are not associated with age or year level that links chronological age to developmental progress. As learners progress through these stages the level of coactive support required decreases moving towards independence.

This document is **Stage 1** in four Stages of the course *Preliminary Science*.

Stage 1

Within Stage 1 learners experience a range of learning activities that will assist them to attend to and explore the world around them with as much independence as possible. Experiences are designed for learners at an emergent level. Learners require high levels of coactive support and focused attention from the teacher to assist them to engage, react and participate. Learners demonstrate some awareness and recognition of familiar people and routine activities.

Stage 2

Within Stage 2 learners are reliant on verbal and physical prompts to facilitate their learning. They begin to explore their world independently and engage in cause-and-effect learning activities. Learners are able to focus on structured learning activities for short periods of time. They respond to familiar people and events in a familiar environment and begin to use 'yes/no' responses.

Stage 3

Within Stage 3 Learners display the first signs of independence, are less reliant on partial physical prompts and respond more consistently to verbal and visual prompts and clear directions from the teacher. Learners begin to interact with their peers in social opportunities. They participate in structured activities alongside their peers and use pictures, photos and objects to communicate personal interests and experiences. They begin to use and link some familiar words and images to form a meaningful communication.

Stage 4

Within Stage 4 learners participate cooperatively in group learning activities with indirect supervision and gestural prompts. They express their feelings, needs and choices in increasingly conventional ways and combine and sequence key words and images to communicate personal interests and to recount significant experiences. They indicate beginning understanding of social rules and expectations and are beginning to reflect on their own behaviour.

Access

Learners can enter the course at any of the four stages depending upon their level of readiness or ability. Providers will determine the entry point for learners based on each learner's level of readiness.

All learners have a right to an education that meets their needs through full participation and engagement with learning. Providers enhance the quality of all students' learning through responsive and planned learning programs that optimise achievement using inclusive practices.

Learners will have access to appropriate resources such as professional support staff; or adult assistance, and equipment such as assistive technology or modified facilities, as required. The Disability Standards for Education, 2005 outline the obligations that educational providers must meet in supporting the needs of learners with disability through reasonable adjustments.

Adjustments include a range of supports and accommodations including but not limited to:

- **supportive learning environments**
- tailored delivery models
- visual and organisational supports
- multimodal learning and assessment opportunities
- access to appropriate technology
- varying levels of prompting and adult assistance.

'Adjustment' does not mean the lowering or removal of standards but rather it means allowing learners appropriate means to demonstrate their learning and achievement against standards.

In the instance of online, distance or flexible delivery, adjustments may be made in the delivery of the courses by providers to suit the individual student's learning environment. This may involve differentiation to reflect the resources readily available to the learner within their home or community.

Pathways

In addition to preparing and providing learners vital skills for personal independence this course prepares learners for a number of vocational pathways that utilise a knowledge of science. For example:

- Access to Vocational Pathways;
- Agriculture; Aquaculture;
- Automotive Vocational Preparation;
- Conservation and Land Management;
- Engineering; Horticulture;
- Hospitality;
- Introduction to Construction; and
- Sport and Recreation.

Resource Requirements

Delivery of this course requires the tools, equipment, workspace(s) and associated facilities to meet the practical requirements of the course.

Course Size And Complexity

This course has a complexity Preliminary to level 1.

Each stage of the course has a size value of 5 or 10 or 15 depending upon learners needs. A learner will undertake a minimum of 50 hours study in this course, through to a maximum of 150 hours dependent on learner needs.

There are many possible ways of combining the Stages of learning and the size value of 5 or 10 or 15 depending upon learners needs.

For example:

- A learner might study Preliminary to Level 1, Stage 3 of the course and complete it in 50 hours. This learner might then study Preliminary to Level 1, Stage 4 of the course and require 100 hours to achieve this. After successful completion, this learner might then undertake a Level 1 course in the following year.
- In one year a learner might study Preliminary to Level 1, Stage 2 of the course and complete it in 50 hours. This learner might then also study Preliminary to Level 1, Stage 3 of the course and require 100 hours to achieve this.
- A learner may study Preliminary to Level 1 Stage 1 in 150 hours.

Course Structure

This course is organised into four sequential stages. Learners can enter the course at any of the four stages depending upon their level of readiness or ability. Providers will determine the entry point for learners.

This document is **Stage 1** of the four stages in this course.

Course Delivery

The sequence of delivery is at the discretion of the provider. A personalised learning program will be developed for each learner, dependent on their needs. Not all learners will achieve all stages of the course content.

Course Content

STAGE 1: (50, 100 AND 150 HOURS)

This course has a size value of 5, 10 or 15.

In Stage 1, learners use their senses to help them understand the world around them and the objects within it. They experience a range of activities that will assist them to attend to and explore the world around them with as much independence as possible. They are exposed to and encouraged to move from a pre-intentional to intentional state, and react to everyday objects, materials and living things. They are exposed to change in the world around them, including changes that impact on them, for example the weather, and changes they can effect, for example making things move or change shape. They use their senses to gather different types of information and learn to initiate and refine their responses to familiar objects and the world around them. In Stage 1 learners must engage with all content in any order within the three strands of the *Australian Curriculum: Science*:

Science as a human endeavour:

- there are objects and living things in the world around us
- tools and equipment can be used in the world around us.

Science Understanding:

- biological sciences: living things are part of the world around us
- chemical sciences: objects are part of the world around us
- Earth and space sciences: changes in the world around us can affect responses
- physical sciences: objects can be moved and touched.

Science Inquiry Skills:

- questioning and predicting: engage and react to objects and events
- planning and conducting: gather information about objects and events
- recording and processing: react and respond to objects and events
- analysing and evaluating: accept and reject objects and events from the world around them
- communicating: respond using accept-or-reject gestures or action.

Assessment

Criterion-based assessment is a form of outcomes assessment that identifies the extent of learner achievement at an appropriate end-point of study. Although assessment – as part of the learning program – is continuous, much of it is formative, and is done to help learners identify what they need to do to attain the maximum benefit from their study of the course.

The standard of achievement each learner attains on each criterion is recorded as a rating of 'C' (satisfactory standard) according to the outcomes specified in the standards section of the course document.

A 't' notation must be used where a learner demonstrates any achievement against a criterion less than the standard specified for the 'C' rating. The 't' notation is not described in course standards.

A 'z' notation is to be used where a learner provides no evidence of achievement at all.

Internal assessment of all criteria will be made by the provider. Assessment processes must gather evidence that clearly shows the match between individual learner performance, the standards of the course and the learner's award.

NOTATION ON EVIDENCE OF LEARNING

Some of the criteria standard elements use the terms reacting, responding and recognising.

In the context of this preliminary level course reacting/responding might be defined as:

- an intentional repeatable and observable behaviour that can be interpreted simply, objectively and conclusively.

In the context of this preliminary level course recognising might be defined as:

- intentionally signalling identification of (someone or something) through gesture, facial expression or sound from having encountered them before.

Quality Assurance Process

Each provider is responsible for ensuring the integrity and validity of their assessment results against the requirements of the course, including standards, and for maintaining records and documentation that will demonstrate the integrity, accuracy and validity of the award decisions they make each year.

Under Section 55ZN of the Office of Tasmanian Assessment, Standards and Certification Act 2003, TASC may give a provider written direction regarding the provision and assessment of an accredited other education course.

Criteria

The assessment of *Preliminary Science* Stage 1 will be based on whether the learner can:

1. Identify and organise by properties and behaviour
2. Use equipment and inquire into the world
3. Complete tasks and communicate ideas and observation

Standards

Criterion 1: Identify and organise by properties and behaviour

The learner:

Rating C
reacts to a familiar object or living thing
reacts to the behaviour of a familiar object or living thing
reacts to indicate a familiar property of their environment.

Criterion 2: Use equipment and inquire into the world

The learner:

Rating C
reacts to a change in a property of an object or living thing through a positive or negative response
reacts to a change in a behaviour of objects or living things through a positive or negative response
reacts to a change in a property of their environment through a positive or negative response
interacts with familiar materials in their environment.

Criterion 3: Complete tasks and communicate ideas and observation

The learner :

Rating C
communicates a response to, or acceptance or rejection of, a familiar object or living thing
communicates a response to, or acceptance or rejection of, a familiar event
communicates a response to, or acceptance or rejection of an element of their environment.

Qualifications Available

Preliminary Science Preliminary to Level 1: Stage 1, 2, 3 or 4 (with the award of):

SATISFACTORY ACHIEVEMENT

PRELIMINARY ACHIEVEMENT

Award Requirements

The final award for *Preliminary Science* Stage 1 will be determined by the provider from three (3) ratings.

The minimum requirements for an award in each Stage of this course are as follows:

Satisfactory Achievement (SA)

3 'C' ratings

Preliminary Achievement (PA)

1 'C' rating

Course Evaluation

The Department of Education's Curriculum Services will develop and regularly revise the curriculum. This evaluation will be informed by the experience of the course's implementation, delivery and assessment.

In addition, stakeholders may request Curriculum Services to review a particular aspect of an accredited course.

Requests for amendments to an accredited course will be forward by Curriculum Services to the Office of TASC for formal consideration. Such requests for amendment will be considered in terms of the likely improvements to the outcomes for learners, possible consequences for delivery and assessment of the course, and alignment with Australian Curriculum materials.

A course is formally analysed prior to the expiry of its accreditation as part of the process to develop specifications to guide the development of any replacement course.

Course Developer

The Department of Education acknowledges the significant leadership of Peter Wright in the development of this course.

Accreditation

The accreditation period for this course is from 1 January 2019 until 31 December 2023.

During the accreditation period required amendments can be considered via established processes. Should outcomes of the Years 9-12 Review process find this course unsuitable for inclusion in the Tasmanian curriculum, its accreditation may be cancelled. Any such cancellation would not occur during an academic year.

Version History

Version 1– Accredited on 14 December 2018 for use from 1 January 2019 until 31 December 2023.

This course replaces PRE015415 Nature and Environment that expired on 31 December 2018.

Appendix

Glossary of verbs

affect	to have an effect on; to
choose	decide or select the most suitable from a number of different options
create	make something
explore	investigate, search for
identify	recognise and name or indicate who or what someone or something is.
label	identify by placing a name or word used to describe the object or thing
react/respond	an intentional repeatable and observable behaviour that can be interpreted simply, objectively and conclusively
recognise	intentionally signalling identification of (someone or something) through gesture, facial expression or sound from having encountered them before
select	choose in preference to another or others.
sequence	arrange in order
show	give information; illustrate
subject matter	refers to the topic or theme under consideration
understand	perceive what is meant, grasp an idea, and to be thoroughly familiar with
