Art Studio Practice is a Level 3 course requiring successful completion of Art Production

Art Studio Practice prepares learners for the study of art at a tertiary level. The course consists of two compulsory areas of learning: Conceptual Knowledge and Practice. Learners are required to prepare a research paper, visual schematic overview, artist's statement and present an exhibition.

Course Description

Art Studio Practice has been designed to enable learners to develop meaningful conceptual knowledge through research and studio practice.

It will challenge learners to engage in reflective and critical analysis to refine, evaluate and articulate their ideas in the consolidation of their artistic practice.

The course integrates knowledge and practice through active art investigation and participation in specialised and authentic learning experiences. It provides a framework for learners to establish links and actively engage with local, national and international art communities.

Learners will negotiate a proposal for self-directed learning. Their sustained investigation will culminate in an exhibition and an interview.

Rationale

Art Studio Practice challenges learners to resolve a proposal to a final visual art exhibition through practical studio and discipline-based investigation. Learners actively investigate the contemporary art world by engaging in self-directed inquiry and authentic learning experiences to build a relevant and meaningful context for their own studio practice. The course enhances pathways from senior secondary to tertiary studies in the visual arts as learners develop their conceptual and analytical research skills. It promotes the consolidation of artistic skills and a deep engagement through a sustained practice characteristic of creative arts learning and professional arts practice. Art Studio Practice is applicable to all studio/discipline areas.

Art Studio Practice provides an opportunity for learners who have completed Art Production to continue their art practice at the Level 3 complexity and thus extend the breadth and depth of their learning. The course allows learners to either continue practice in a studio/discipline area or to explore a new studio/discipline area within the context of creating and refining an exhibition proposal for a body of work, and completing it to resolution.

Learning Outcomes

On successful completion of this course, learners will be able to:

1. critique own art, and the art work of others
2. apply artistic judgements to resolve aesthetic and conceptual issues
3. understand historical and contemporary art issues, their impact on society, artists and own art works
4. apply the principles of reflective practice and academic integrity
5. use artistic techniques, media and technologies to create art works
6. work autonomously, and collaboratively with others
7. design, manage and implement to resolution a studio exhibition
8. communicate artistic concepts.

Access

Learners are required to complete Art Production Level 3 (or equivalent) as a prerequisite.

Pathways

Learners who have successfully completed *Art Production ART 315117* are well placed to undertake *Art Studio Practice*. Students who complete *Art Studio Practice ART3152214* are prepared for the study of visual arts at tertiary level.

Resource Requirements

Learners will require:

- access to studio space and materials appropriate to the selected studio/discipline area
- studio exhibition space appropriate for the body of work
- periodic access to reference materials and resources (e.g. the internet).

Learners are required to work in small groups for critical appraisal and evaluation activities.

Attendance at relevant art exhibitions and events is encouraged.

Course Size And Complexity

This course has a complexity level of 3.

At Level 3, the learner is expected to acquire a combination of theoretical and/or technical and factual knowledge and skills and use judgement when varying procedures to deal with unusual or unexpected aspects that may arise. Some skills in organising self and others are expected. Level 3 is a standard suitable to prepare learners for further study at tertiary level. VET competencies at this level are often those characteristic of an AQF Certificate III.

This course has a size value of 15.

Course Requirements

Work submitted for assessment in Art Studio Practice must be produced over the duration of one calendar school year, be unique to this course and not be work submitted for assessment in any other course.

Course Content

This course consists of two compulsory areas of learning:

- Conceptual knowledge
- Practice.

CONCEPTUAL KNOWLEDGE

Research - Active Investigation

Research will be undertaken within the local, national and international art community through exhibitions, events, reviews and interviews with artists, curators, gallery directors, Arts administrators.

Learners will engage in a minimum of 3 investigations resulting in the production of a range of evidence.

Learners will develop their concepts and establish a context for their work.

This evidence may be in the form of a presentation and may be submitted as a hard copy.

Critical Analysis

Learners will undertake investigation and analysis of conceptual theories and issues in local, historical and contemporary contexts as they relate to and inform their own proposal and studio practice.

Learners will produce one major research paper with a minimum of 3,500 words. Learners will use the paper to demonstrate the depth and complexity of their conceptual knowledge.

Reflection

The learner will accumulate information in support of a sustained practice that reflects the aim of the research proposal.

A negotiated project will be articulated through the:

1. production of a Visual Schematic Overview; and
2. learner's artist statement consisting of 150 – 300 words.

The scope of the Visual Schematic Overview will represent the learner's sustained practice reflecting their conceptual development over the period of a year's study.

Reflection will also involve a formalised critical appraisal and evaluation of work in groups of two or more and will occur at least six (6) times. Groups will comprise of peers, supported by teacher/s and/or other artists.

PRACTICE

Proposal

The learner will develop a research proposal for studio practice in negotiation with their facilitator. The proposal will culminate in an exhibition.

As the proposal provides the context for studio practice and because the initial proposal will undergo a process of refinement, learners will give high priority to the development of their initial proposal.

The proposal is a focus statement of intention. The learner will make and record in the proposal crucial decisions with regard to the exhibition layout and design. The proposal outlines the key elements of the intended exhibition plan including the:

- conceptual idea underpinning the exhibition
- context of the body of work to be exhibited
- selection of materials and media
- selection and application of artistic techniques
- scale of the exhibition

- design elements of the exhibition space (e.g. lighting, hanging arrangement of works).

As such the proposal models the form and scope of a proposal for exhibition that might be presented to a gallery director.

The success of the proposal is reflected in the cohesive strength of the final exhibition. The degree to which learners are able to resolve aesthetic and conceptual issues is clearly evidenced in the stylistic, technical and conceptual resolution of the work on display.

It is not intended that the proposal be in essay form. Rather, it is an exhibition plan or focus statement: a clarification of the key idea underpinning the body of works exhibited; and the intended use of materials, scale of work and exhibition design. It will focus on the 'what', 'how', and 'why' of the exhibition. The final proposal will use concise language and be approximately 500 words in length.

Studio Practice

Process documentation will be sustained through reflective commentary and the experimentation and exploration of media and techniques.

Studio specialisation will occur that demonstrates the learner's depth and complexity of conceptual understanding.

It will reflect sustained practical rigour and engagement based upon the aims of the research proposal.

The learner will present a body of resolved art work for exhibition. The scope of the body of art work will be dependent on issues such as selected media, but will reflect the size value of this course.

Exhibition

Learners will be required to act autonomously in assuming complete responsibility for the creative design, organisation and installation of their exhibition.

The exhibition of work will include:

- preparation incorporated into the negotiated proposal
- planning for allocation of appropriate time and resources
- the design and hanging of the exhibition
- presentation of process documentation
- display of learner's artist statement.

Assessment

Criterion-based assessment is a form of outcomes assessment that identifies the extent of learner achievement at an appropriate end-point of study. Although assessment – as part of the learning program – is continuous, much of it is formative, and is done to help learners identify what they need to do to attain the maximum benefit from their study of the course. Therefore, assessment for summative reporting to TASC will focus on what both teacher and learner understand to reflect end-point achievement.

The standard of achievement each learner attains on each criterion is recorded as a rating 'A', 'B', or 'C', according to the outcomes specified in the standards section of the course.

A 't' notation must be used where a learner demonstrates any achievement against a criterion less than the standard specified for the 'C' rating.

A 'z' notation is to be used where a learner provides no evidence of achievement at all.

Providers offering this course must participate in quality assurance processes specified by TASC to ensure provider validity and comparability of standards across all awards. To learn more, see TASC's [quality](#)

[assurance](#) processes and [assessment](#) information.

Internal assessment of all criteria will be made by the provider. Providers will report the learner's rating for each criterion to TASC.

TASC will supervise the external assessment of designated criteria which will be indicated by an asterisk (*). The ratings obtained from the external assessments will be used in addition to internal ratings from the provider to determine the final award.

Quality Assurance Process

The following processes will be facilitated by TASC to ensure there is:

- a match between the standards of achievement specified in the course and the skills and knowledge demonstrated by learners
- community confidence in the integrity and meaning of the qualification.

Process –TASC gives course providers feedback about any systematic differences in the relationship of their internal and external assessments and, where appropriate, seeks further evidence through audit and requires corrective action in the future.

External Assessment Requirements

The external assessment requirements for this course assess criteria 1, 2, 6 & 7.

Further information regarding external assessment processes and requirements is articulated in the TASC issued [Assessment Guidelines](#) which can be found in the Supporting Documents below.
