Dance is a Level 2 course requiring a commitment to teamwork

Learners study dance making and performance skills as well as reflecting on and responding to, their own and others work. Solo and group work is a course requirement. The four compulsory units of work are Dance skills, Dance Making, Preparation and Performance and Reflection and Appreciation. Dance Level 2 provides a pathway to Dance Choreography and Performance.

Course Description

Dance provides opportunities for learners to gain experience in aspects of dance skills, dance making, performance and appreciation. Learners will extend their awareness and application of the dance making process, both as individuals and as part of a group.

Learners will be introduced to different approaches to dance making and will be guided in the development of their movement and performance skills. They will develop skills in relation to reflection and appreciation of their own work and the work of others, including professional choreographers and dance companies.

Learners are encouraged to refer to Australian choreographers and dance companies.

Fundamental to all aspects of the course is the learner's awareness and demonstration of safety, for self, around others, and in the space.

Rationale

Dance is recognised as a significant component of Australian performing arts. Dance is the universal language of movement which conveys meaning and evokes emotions in audiences from all social and cultural communities. Dance is a mainly non-verbal mode of communication that can express life experiences, observations and reflections.

The study of dance contributes to the learner's total development including their artistic, aesthetic and cultural education. Through dance, learners create their own expressive movement, and develop an appreciation of how other dance artists represent thoughts and intentions.

This course provides learners with the opportunity to extend their knowledge of dance as an art form, and to further their skills in performance. Learners will gain an understanding of how a choreographer creates movement and dance work, and how that choreography is translated into performance.

Dance will allow learners to develop their confidence in a non-threatening and inclusive work environment. Students will learn specific dance skills, dance making techniques, performance and appreciation skills, and gain enjoyment from their participation in dance related activities.

Aims

Dance aims to provide learners with some previous experience, or those entering dance study at this level, with an extended understanding and appreciation of dance as an art form.

Dance aims to assist learners realise personal benefits such as developing health and well-being skills, personal hygiene, fitness and social interaction skills.

Learning Outcomes

On successful completion of this course, learners will be able to:

1. create basic original dance works
2. perform basic dance works requiring limited technique
3. work independently and constructively with others in small groups
4. apply appropriate first response to injury and safe dance practice
5. be able to reflect upon the dance work of self and others
6. in addition, learners may recognise the place of dance within the performing arts
7. in addition, learners may understand how dance can be an enjoyable leisure activity and a means to a healthy life style.

Access

Learners with physical disabilities can access this course and receive an award commensurate with their ability to successfully meet the Criteria and Standards. For some learners, this may be a Preliminary Achievement (PA) or a Satisfactory Achievement (SA).

This course requires learners to work in groups.

Pathways

Dance is the second in a suite of three TASC dance courses.

Some learners may complete Dance as a stand-alone course, with no intended pathway to further dance study.

For learners with a more focussed pathway, successful completion of this course may lead to a variety of senior secondary courses e.g. Dance Choreography and Performance Level 3, Drama Level 2, Drama Level 3, and other performing arts courses.

This course is also suitable for learners with career pathways that include Education, Child Care, Sport and Recreation, forms of Community Theatre and Community Arts Events.

Resource Requirements

This course requires access to a suitable and safe space for movement activities and dance work, free from potentially hazardous obstacles. The space will be adequate in size and ventilation to cater for the movement activities of individuals and small groups, and whole class work as required.

Access to audio equipment will be required (e.g. CD players, MP3s, amplification devices).

Access to technology equipment for the viewing of recorded dance works will be required (e.g. DVDs, YouTube, videos).

Some learners may choose to use personal sound/music devices in practical activities (e.g. iPods, MP3 players, iPhones).

Course Size And Complexity

This course has a complexity level of 2.

At Level 2, the learner is expected to carry out tasks and activities that involve a range of knowledge and skills, including some basic theoretical and/or technical knowledge and skills. Limited judgement is required, such as making an appropriate selection from a range of given rules, guidelines or procedures. VET competencies at this level are often those characteristic of an AQF Certificate II.

This course has a size value of 15.

Course Requirements

Unit 1, Unit 2 and Unit 3 will be delivered sequentially. Unit 4 will be delivered concurrently with the other units.

Some learning activities will be specific to one unit. Some learning activities will be addressed in more than one unit.

Assessment

Criterion-based assessment is a form of outcomes assessment that identifies the extent of learner achievement at an appropriate end-point of study. Although assessment – as part of the learning program – is continuous, much of it is formative, and is done to help learners identify what they need to do to attain the maximum benefit from their study of the course. Therefore, assessment for summative reporting to TASC will focus on what both teacher and learner understand to reflect end-point achievement.

The standard of achievement each learner attains on each criterion is recorded as a rating 'A', 'B', or 'C', according to the outcomes specified in the standards section of the course.

A 't' notation must be used where a learner demonstrates any achievement against a criterion less than the standard specified for the 'C' rating.

A 'z' notation is to be used where a learner provides no evidence of achievement at all.

Providers offering this course must participate in quality assurance processes specified by TASC to ensure provider validity and comparability of standards across all awards. To learn more, see TASC's [quality assurance](#) processes and [assessment](#) information.

Internal assessment of all criteria will be made by the provider. Providers will report the learner's rating for each criterion to TASC.

Quality Assurance Process

The following processes will be facilitated by TASC to ensure there is:

- a match between the standards of achievement specified in the course and the skills and knowledge demonstrated by learners
- community confidence in the integrity and meaning of the qualification.

Process – TASC will verify that the provider's course delivery and assessment standards meet the course requirements and community expectations for fairness, integrity and validity of qualifications TASC issues. This will involve checking:

- learner attendance records; and
- course delivery plans (the sequence of course delivery/tasks and when assessments take place):
 - assessment instruments and rubrics (the 'rules' or marking guide used to judge achievement)
 - class records of assessment
 - examples of learner work that demonstrate the use of the marking guide
 - samples of current learner's work, including that related to any work requirements articulated in the course document.

This process may also include interviews with past and present learners.

It will be scheduled by TASC using a risk-based approach.
