- <sup>1</sup> These are standardised measures of differences. A value between about -2.0 and 2.0 shows a difference that, in any one year, may reflect chance variations. A value outside these limits shows a difference that may be taken seriously. The school / college value is compared with the state-wide value for all schools and colleges and with schools and colleges from the same sector.
- <sup>2</sup> The proportion taking (even those not completing) TQA level 3 maths or science can be seen as an (indirect) indicator of the aspirations of the student group.
- <sup>3</sup> This percentage is the proportion of those students with an ATAR (known as a TER before 2009) who have done some VET.
- <sup>4</sup> This is a scale that compares overall achievement using all studies - VET competencies, TQA accredited and TQA recognised - whenever they have been completed.
- <sup>5</sup> Estimated from ABS SEIFA 2006 data linked by address.
- <sup>6</sup> These are standardised measures of differences from the previous year. The value this year is compared with the value for the corresponding group in the previous year. The standardising uses a pooled variance estimate. A value between about -2.0 and 2.0 shows a difference that in any pair of years may reflect chance variations. A value outside these limits shows a difference that may be taken seriously. An arrow indicates a significant three year trend.
- <sup>7</sup> Estimated from ARIA++ 2006 data linked by address.
