

TASC advice *Technologies* [as of 13 May 2020]

Workshop Techniques Introduction Level I (WTEI10114)

TASC, with a focus on honouring the nature and intention of the **Design Technologies**, also recognises the extraordinary circumstances facing learners and teachers in 2020.

Recognising that creating designed solutions and the development of process and production skills are fundamental if students are to demonstrate their learning in Design Technologies, the course content remains even though students may not be able to provide evidence of their learning in the traditional means of engagement. These recommendations are intended to give teachers maximum flexibility to help students provide evidence of their learning.

<i>Workshop Techniques Introduction Level I (WTEI10114)</i>	
Course content: Work expectations	<p>Scenario A - Medium term Return to <i>school environment</i> mid/end of July</p> <p><i>Alternative approaches to teaching and learning are required to deliver course requirements. No specific 2020 considerations have been applied to this course.</i></p> <p>Course content Work Expectations</p> <p>Providers may need to consider the timetable requirements for delivery of this course. As it is an 100 hour course providers may decide to:</p> <ul style="list-style-type: none">• investigate viability of intensive practical experiences later in the year• maintain student engagement with learning as suitable in a learning from home scenario until students can engage with the practical components. For example, students may develop prototypes and models of their products using materials available at home, where appropriate.
