**The study of German contributes to the overall education of learners, particularly in the areas of communication, intercultural understanding and general knowledge. Through studying German, learners gain access to German-speaking communities in Germany, Austria and Switzerland as well as in other European countries and across the world, including Australia**

The ability to communicate in German will (in conjunction with other skills acquired in the study of this course) provide learners with enhanced vocational opportunities and the possibility to apply German culture and language skills to work, further study, training or personal interests. This Foundation course is designed for beginners with no experience of learning German. This course is also suitable for learners who have had some prior exposure to German and who wish to develop their skills, knowledge, and understanding of the German language and German-speaking cultures.

## Course Description

Learners will use German to communicate with others by:

- listening and responding to basic spoken German
- communicating in basic spoken German
- reading and responding to basic written German
- expressing ideas and information in basic written German.

This is done within a contextual framework of two prescribed themes:

1. The individual
2. German-speaking communities.

These themes, and their topics and sub-topics, have been selected to enable learners to develop their understanding of how language and culture are inter-related.

The themes have a number of topics and sub-topics. The placement of the topics under themes is intended to provide a particular perspective for each of the topics. The sub-topics expand on the topics and guide the learner and teacher as to how the topics will or may be treated.

In this Level 2 Foundation course, there is a special, compulsory focus on the 'Contemporary Society and Culture' Topic of the 'German-speaking communities' Theme. This Topic's sub-topics will include:

- contemporary German social customs
- significant aspects of daily life in German-speaking communities
- significant aspects of contemporary German culture.

It is not expected that all themes and topics will require the same amount of study time. The length of time and depth devoted to each topic will vary according to the linguistic needs and interests of the learner, and the compulsory focus noted above.

## Rationale

The study of German contributes to the overall education of learners, particularly in the areas of communication, cross-cultural understanding and general knowledge. It provides access to the culture of Germany and German-speaking communities. The study promotes understanding of different attitudes and values within the wider Australian community and beyond.

The ability to communicate in German may, in conjunction with other skills acquired in the study of this course, provide learners with enhanced vocational opportunities, and the ability to apply German to work, further study, training or leisure situations.

This Foundation course is suitable for beginners with no experience of learning German as well as learners who have had some prior exposure to German and who wish to develop their skills, knowledge and understanding of German language and culture.

## Learning Outcomes

On successful completion of this course, learners will be able to:

1. use German to communicate with others by listening and responding to basic spoken German
2. use German to communicate with others by communicating in basic spoken German
3. use German to communicate with others by reading and responding to basic written German
4. use German to communicate with others by expressing ideas and information in basic written German

**Course Size And Complexity**

This course has a complexity level of 2.

At Level 2, the learner is expected to carry out tasks and activities that involve a range of knowledge and skills, including some basic theoretical and/or technical knowledge and skills. Limited judgement is required, such as making an appropriate selection from a range of given rules, guidelines or procedures. VET competencies at this level are often those characteristic of an AQF Certificate II.

### USE OF ENGLISH

Learners will study a range of oral and written texts in German. It may be appropriate in some circumstances to select texts using English. Equally, it may be appropriate for a learner to respond to a text in English on some occasions.

### TEXT TYPES

The learner will become familiar with a variety of text types. Providers may introduce the learner to a wider range of text types in the course of their teaching and learning program:

## VOCABULARY

While there is no nationally prescribed vocabulary list, it is expected that learners will be familiar with a range of vocabulary and idioms relevant to the themes described in the course.

## DICTIONARIES

Learners will be encouraged to use dictionaries. It is expected that teachers will assist learners to develop the necessary skills and confidence to use dictionaries effectively.

## GRAMMAR AND STRUCTURES

Grammar can be referred to as the organisation of, and relationship between, all the elements that constitute a language as it functions.

There are many different theories of grammar, and a number of different approaches towards its teaching and learning. The categories used below are not intended to promote any particular theory of grammar, or to favour one methodology over another.

Developing the learner's ability to convey meaning effectively in a range of contexts will, however, necessarily involve extending awareness of the system of structures underlying the language, as well as the ability both to apply and adapt this knowledge.

The following grammatical structures are those that the learner is expected to recognise and use.

| Grammatical item    | Sub-elements                                | Example(s)  |

## Assessment

Criterion-based assessment is a form of outcomes assessment that identifies the extent of learner achievement at an appropriate end-point of study. Although assessment – as part of the learning program – is continuous, much of it is formative, and is done to help learners identify what they need to do to attain the maximum benefit from their study of the course. Therefore, assessment for summative reporting to TASC will focus on what both teacher and learner understand to reflect end-point achievement.

The standard of achievement each learner attains on each criterion is recorded as a rating 'A', 'B', or 'C', according to the outcomes specified in the standards section of the course.

A 't' notation must be used where a learner demonstrates any achievement against a criterion less than the standard specified for the 'C' rating.

A 'z' notation is to be used where a learner provides no evidence of achievement at all.

Providers offering this course must participate in quality assurance processes specified by TASC to ensure provider validity and comparability of standards across all awards. To learn more, see TASC's [quality](#)

[assurance](#) processes and [assessment](#) information.

Internal assessment of all criteria will be made by the provider. Providers will report the learner's rating for each criterion to TASC.

## Quality Assurance Process

The following process will be facilitated by TASC to ensure there is:

- a match between the standards of achievement specified in the course and the skills and knowledge demonstrated by learners
- community confidence in the integrity and meaning of the qualification.

**Process** – TASC will verify that the provider's course delivery and assessment standards meet the course requirements and community expectations for fairness, integrity and validity of qualifications TASC issues. This will involve checking:

- learner attendance records; and
- course delivery plans (the sequence of course delivery/tasks and when assessments take place):
  - assessment instruments and rubrics (the 'rules' or marking guide used to judge achievement)
  - class records of assessment
  - examples of learner work that demonstrate the use of the marking guide
  - samples of current learner's work, including that related to any work requirements articulated in the course document.

This process may also include interviews with past and present learners.

It will be scheduled by TASC using a risk-based approach.

## Criteria

The assessment for German – Foundation Level 2 will be based on the degree to which a learner can:

1. listen and respond to spoken German

Requests for amendments to an accredited course will be forwarded by Curriculum Services to the Office of TASC for formal consideration.

Such requests for amendment will be considered in terms of the likely improvements to the outcomes for learners, possible consequences for delivery and assessment of the course, and alignment with Australian Curriculum materials.
